KAIZEN XP

The Frontline CI Starter Kit

Spot problems. Fix them properly.
Make the fix stick.

5 SIMPLE TOOLS. REAL RESULTS.

FILLABLE ON SCREEN. PRINTABLE ON PAPER.

*"Do what nobody else can be bothered to do,
and you'll get what nobody else gets."*

FOR SHIFT SUPERVISORS AND FRONTLINE TEAMS

HOW TO USE THIS KIT

Five tools. No jargon. No 40-page manual.

Most people turn up, do the job, and go home. Nothing wrong with that.

But the people who get noticed, who get asked to act up, who get the development and the opportunities, all tend to do one thing differently: they leave the place better than they found it, and they can prove it.

That is all continuous improvement really is. Not a qualification. Not a buzzword. Just spotting problems, fixing them properly, and keeping a record so the fix sticks and the credit lands where it should.

These five tools are the ones that actually get used on a shop floor. No jargon. No 40-page manual. Print them, keep them on the line, fill them in as you go.

THE FIVE TOOLS

1. **Shift Handover Log**
   Stop problems dying at the end of your shift.
2. **5 Whys Worksheet**
   Get to the real cause instead of the obvious one.
3. **Quick Wins Tracker**
   Log small improvements so they add up to something visible.
4. **One-Page RCFA**
   A proper root cause investigation, stripped to what matters.
5. **Daily CI Habit Tracker**
   One improvement a day. That is the whole method.

> **START HERE**
> Start with the Daily CI Habit Tracker. Use it for two weeks before touching anything else.

> **HOW TO USE THIS PDF**
> On screen: open it in the free Adobe Acrobat Reader app (phone or computer), or in Chrome or Edge. Tap a box to type. Boxes with a small gold arrow open a list to pick from. Save a copy each time you start a new sheet. Some built-in phone PDF viewers do not show the lists, so use Acrobat Reader if they are missing.
> On paper: print the pages you need and write straight in the boxes. The lists work as write-in boxes.

SHIFT HANDOVER LOG

Fill this in during the last 20 minutes of your shift. Hand it over in person.

DATE | **SHIFT** | **LINE / AREA**

HANDED OVER TO | **HOW**

RUNNING NOW / CURRENT STATUS

PROBLEMS STILL OPEN (WHAT, WHERE, WHAT YOU TRIED)

WATCH THIS (SOMETHING NOT BROKEN YET, BUT HEADING THAT WAY)

PARTS / MATERIALS NEEDED

ANYTHING THE NEXT SHIFT MUST NOT DO

WHY THIS MATTERS

Most repeat faults are not new. They are old faults that never got handed over properly.

5 WHYS WORKSHEET

Keep asking why until the answer is something you can actually fix.

THE PROBLEM (BE SPECIFIC: WHAT, WHERE, WHEN, HOW OFTEN)

1 WHY?

2 WHY?

3 WHY?

4 WHY?

5 WHY?

ROOT CAUSE (THE LAST ANSWER YOU CAN DO SOMETHING ABOUT)

THE FIX

WHO OWNS IT **BY WHEN** **STATUS**

THE RULE

If your root cause is a person, you have not gone deep enough. Go again.

5 WHYS WORKSHEET: WORKED EXAMPLE

Notice how each answer becomes the next question. That is the whole trick.

THE PROBLEM (BE SPECIFIC: WHAT, WHERE, WHEN, HOW OFTEN)

Line 3 labeller jams at reel changes. About 4 times a shift on nights, 6 minutes lost each time.

1 WHY? *Why does it jam? The new reel splice catches on the guide roller.*

2 WHY? *Why does it catch? The splice tape is sticking out past the edge of the label web.*

3 WHY? *Why is it sticking out? Each operator applies the splice tape at a different angle.*

4 WHY? *Why is it done differently? Nobody was ever shown one right way. It is picked up by watching.*

5 WHY? *Why was nobody shown? There is no standard or one-point lesson for splicing.*

ROOT CAUSE (THE LAST ANSWER YOU CAN DO SOMETHING ABOUT)

No standard method for splicing the label reel, so everyone does it their own way.

THE FIX

Mark a splice guide on the table. Write a one-point lesson with photos. Show every crew this week.

WHO OWNS IT *Sam (nights)* **BY WHEN** *Friday 7th* **STATUS** *Done and checked*

WHY IT WORKS

The first answer, "the splice catches", would have led to replacing a roller. Three more whys found a fix that costs nothing and stops it on every shift.

QUICK WINS TRACKER

Small fixes, logged. Twenty of these in a year is a track record nobody can argue with.

TAKE THIS TO YOUR NEXT ONE-TO-ONE

Do not wait to be asked what you have been doing. Hand this over.

DATE	WHAT I SPOTTED	WHAT I DID	RESULT
Tue 4th	*Spare reels kept in the store, 10 min walk*	*Moved them next to the labeller*	*Saved time*

Keep going. The list is the proof.

DATE	WHAT I SPOTTED	WHAT I DID	RESULT

ONE-PAGE RCFA

For the faults that keep coming back. Do this properly once, and it stops.

DATE RAISED | **EQUIPMENT / LINE** | **REF**

RAISED BY | **IMPACT TYPE**

1. WHAT ACTUALLY HAPPENED (FACTS ONLY, NO OPINIONS)

2. IMPACT (DOWNTIME, WASTE, COST, SAFETY, QUALITY)

3. POSSIBLE CAUSES (LIST EVERYTHING, THEN RULE THEM OUT)

4. ROOT CAUSE (EVIDENCE, NOT A GUESS)

5. CONTAINMENT (STOPS IT TODAY)

6. PERMANENT FIX (STOPS IT FOREVER)

7. HOW WILL YOU KNOW IT WORKED? (THE CHECK, AND THE DATE YOU WILL CHECK IT)

CHECK DATE | **DID IT WORK?**

Fault too big for one page? The Kaizen XP RCFA Template takes you through the full eight-step investigation.

DAILY CI HABIT TRACKER

One improvement a day. Tick the box. That is the entire method.

MONTH _____ **AREA** _____

DAY	THE ONE THING I IMPROVED TODAY	DONE
1		☐
2		☐
3		☐
4		☐

IT DOES NOT HAVE TO BE BIG

A label moved. A tool put back where it lives. One step written down. Small and every day beats big and once a year.

FIVE TOOLS IN

Now make sure it gets seen.

The rest of the Kaizen XP range

THE VISIBILITY KIT

Six tools that make sure the work you already do actually gets seen.

THE RCFA TEMPLATE

The full root cause investigation, for faults that keep coming back.

THE MTBA ASSIST TRACKER

Measure how often a job needs a hand, then prove you fixed it.

THE KPI IMPACT CALCULATOR

Put a pound sign on any problem in two minutes.

THE BREAKDOWN ANALYSIS DASHBOARD

MTBF, MTTR and a Pareto of which machine to fix first.

Every fix you log here belongs in the Visibility Kit.

All available from Kaizen XP.
